

## **Transfer Station Update**

**February 28, 2022**

- 1) We were closed on Friday February 25 because of the weather. We were open both days the weekend before and were fairly steady.
- 2) The Public Works plowed and sanded so we could be open on the 26<sup>th</sup>. Thanks to the Public Works for such timely plowing!!
- 3) We had two containers emptied last week. One bulky, one cardboard. We didn't need any containers emptied from this past weekend the 26<sup>th</sup>.
- 4) When the containers were being changed out last week, the ground was soft and the truck created some ruts. I don't know how to fix this. Any help/advice would be greatly appreciated.
- 5) We have hired another person as an attendant. She will be starting on Friday. We will work her into the weekly schedule so she will be ready for the summer.
- 6) Last Saturday around 1:00PM I slipped and fell on an icy patch by the retaining wall where the public doesn't go. We use this area to navigate when we are putting the blue snow fence up to close off the 2<sup>nd</sup> bulky container. It will be sanded from now on. As a result of my slip. I went to the hospital for an evaluation. They kept me overnight for observation and I think I had a mild concussion. I am back to normal now and wanting to put this winter behind us.

Respectfully submitted  
John Upham
