

## **Transfer Station Update**

**April 4, 2022**

- 1) It was fairly steady on Friday. Saturday was not as busy as last Saturday.
- 2) We are having the new employee come in for 4 hours a week. This next week we are having Justin come in Saturday from 10 to 2. Hopefully we will have enough business to get him orientated on the computer.
- 3) The ground is drying up.
- 4) We have had residents asking when the swap shop is going to open. We are telling people around the middle of April. We have started clearing it out and rearranging the set up.
- 5) We have to step back and figure out the siding and painting of the swap shop/haz mat building.
- 6) We are also fielding questions about the leaf and brush pile. The snow pile is going down but isn't gone yet. Then the ground will have to dry up. We are monitoring this and will open when the ground there is dry.
- 7) We have issued 2046 stickers as of last weekend.
- 8) I am waiting to get the proposals from two cement contractors regarding the pads we would like poured this year. We will share the information as we receive it.

**Respectfully submitted  
John Upham**
